

## United Nations Children's Fund

UNICEF's mission is to effectively comply children's rights, ensure a dignified life and protect them from any danger. In this case, the regions that this committee will focus on are Africa and India. This committee's goal is to find a solution for the issue of the recruitment of children into gangs and armed groups in the geographical region of central Africa and to the Water deficit and sanitation problem for children in Africa as well as India issue. Now it is in your hands to change this situation, and to assure the future of children in this areas.

**Topic A: Recruitment of children into armed groups and gangs in the region of central Africa:** Children are joining armed groups like civil militia, government armed forces and paramilitary groups. The central African region is struggling more with these issues. They are joining these groups because either they are recruited to gain an economical benefit that they generate to the association, to serve as a military force - with low or null payment or because of the fact that children are much easier to control than adults. Another reason is that children think that these groups will give them security, food or any other kind of goods, that no one else will give them. Most of the kids that join these groups are orphans, so they see these groups as a new family.

**Topic B: Water deficit and sanitation problem for children in Africa as well as India:** Nowadays, the water deficit a global problem, and in regions such as Africa or India, the problem is worse. This is a consequence of the basic and non-advanced sanitation system, the scattered clean water that is available for the children in these places is being contaminated or used incorrectly. The main cause of these problems is the bad management, planification and control of the government's secretaries that are in charge of the sanitation systems. Children are the most affected..

In order to achieve viable effective solutions that can cause an impact in these regions, we need you to create proposals along with plans to implement them. They have to stipulate how long would it take to apply the solutions in both of the regions, a real budget and the economical resources that each country or institution will contribute with, and to make sure that the solution that we achieve has fresh new ideas. I'm totally sure that all of you have the ability to create these kind of solutions, and with all your ideas write viable solutions. I'm also sure that we can help to eradicate these problems. Hope to see you soon delegates.
